FEBRUARY

Are your eyes feeling dry this winter? When we turn the heat up, we turn the moisture down and our eyes feel it first! This dry, sometimes gritty feeling can cause your vision to blur and makes it tempting to rub at your eyes- which you should never do! Come in today to see how our doctors can help relieve your “winter eyes”!

Did You Know?

Dark Chocolate has high concentrations of flavonoids; the antioxidant found teas and red wine. Scientists say that these flavonoids increase blood flow to the brain AND the retina of the eye!

Now You Know.

Let's ask Dr. Basilice; "Can I have my cataracts removed *and* get rid of my glasses at the same time?"

A cataract is a clouding of the eye's naturally clear lens. Cataracts can start to develop in our 40s and slowly progress, often without notice. Signs of cataract progression can include trouble with driving at night, especially in the rain, glare and halos around lights, colors that appear to be faded, decreased vision or a "film" over your vision. If you are experiencing any of these symptoms it might be time for you to have your cataracts removed and reclaim the vision you once had!

Cataract surgery removes the old, clouded lens and replaces it with a new, artificial one that restores your vision. Standard cataract surgery often eliminates the need for distance glasses, but with advances in today's technology, our surgeons now have the ability to eliminate your dependence on glasses for distance and near. This is known as Refractive Cataract Surgery and is accomplished with the use of special multi focal or accommodating lenses. These lenses provide excellent vision at all distances, under all lighting conditions **and can give you independence from all glasses!** Even patients who have mild cataracts, without symptoms, may be eligible for this procedure.

At The Ophthalmic Center we specialize in refractive Cataract Surgery-give us a call today and take the first step toward better vision and freedom from your dependency on glasses!

Not eligible for refractive cataract surgery but still want to be free from glasses? Call today and schedule a free Laser Vision Correction Consultation! With our winter promotion you'll receive a discount on LVC Surgery!

What Dr. Basilice's Wife, Dahna knows for sure:

***"We Fall In Love by Chance.
We Stay In Love by Choice."***
